Non-Potable Water System Winterization Schedule

Third Saturday in October (Every Year)

This is your chance to blow out your privately owned irrigation system, while we do the Districts lines. Just be home during the time for your color coded area listed below and blow out each zone on your system for about 3 to 4 minutes. If you're not going to be home set your clock to your time zone.

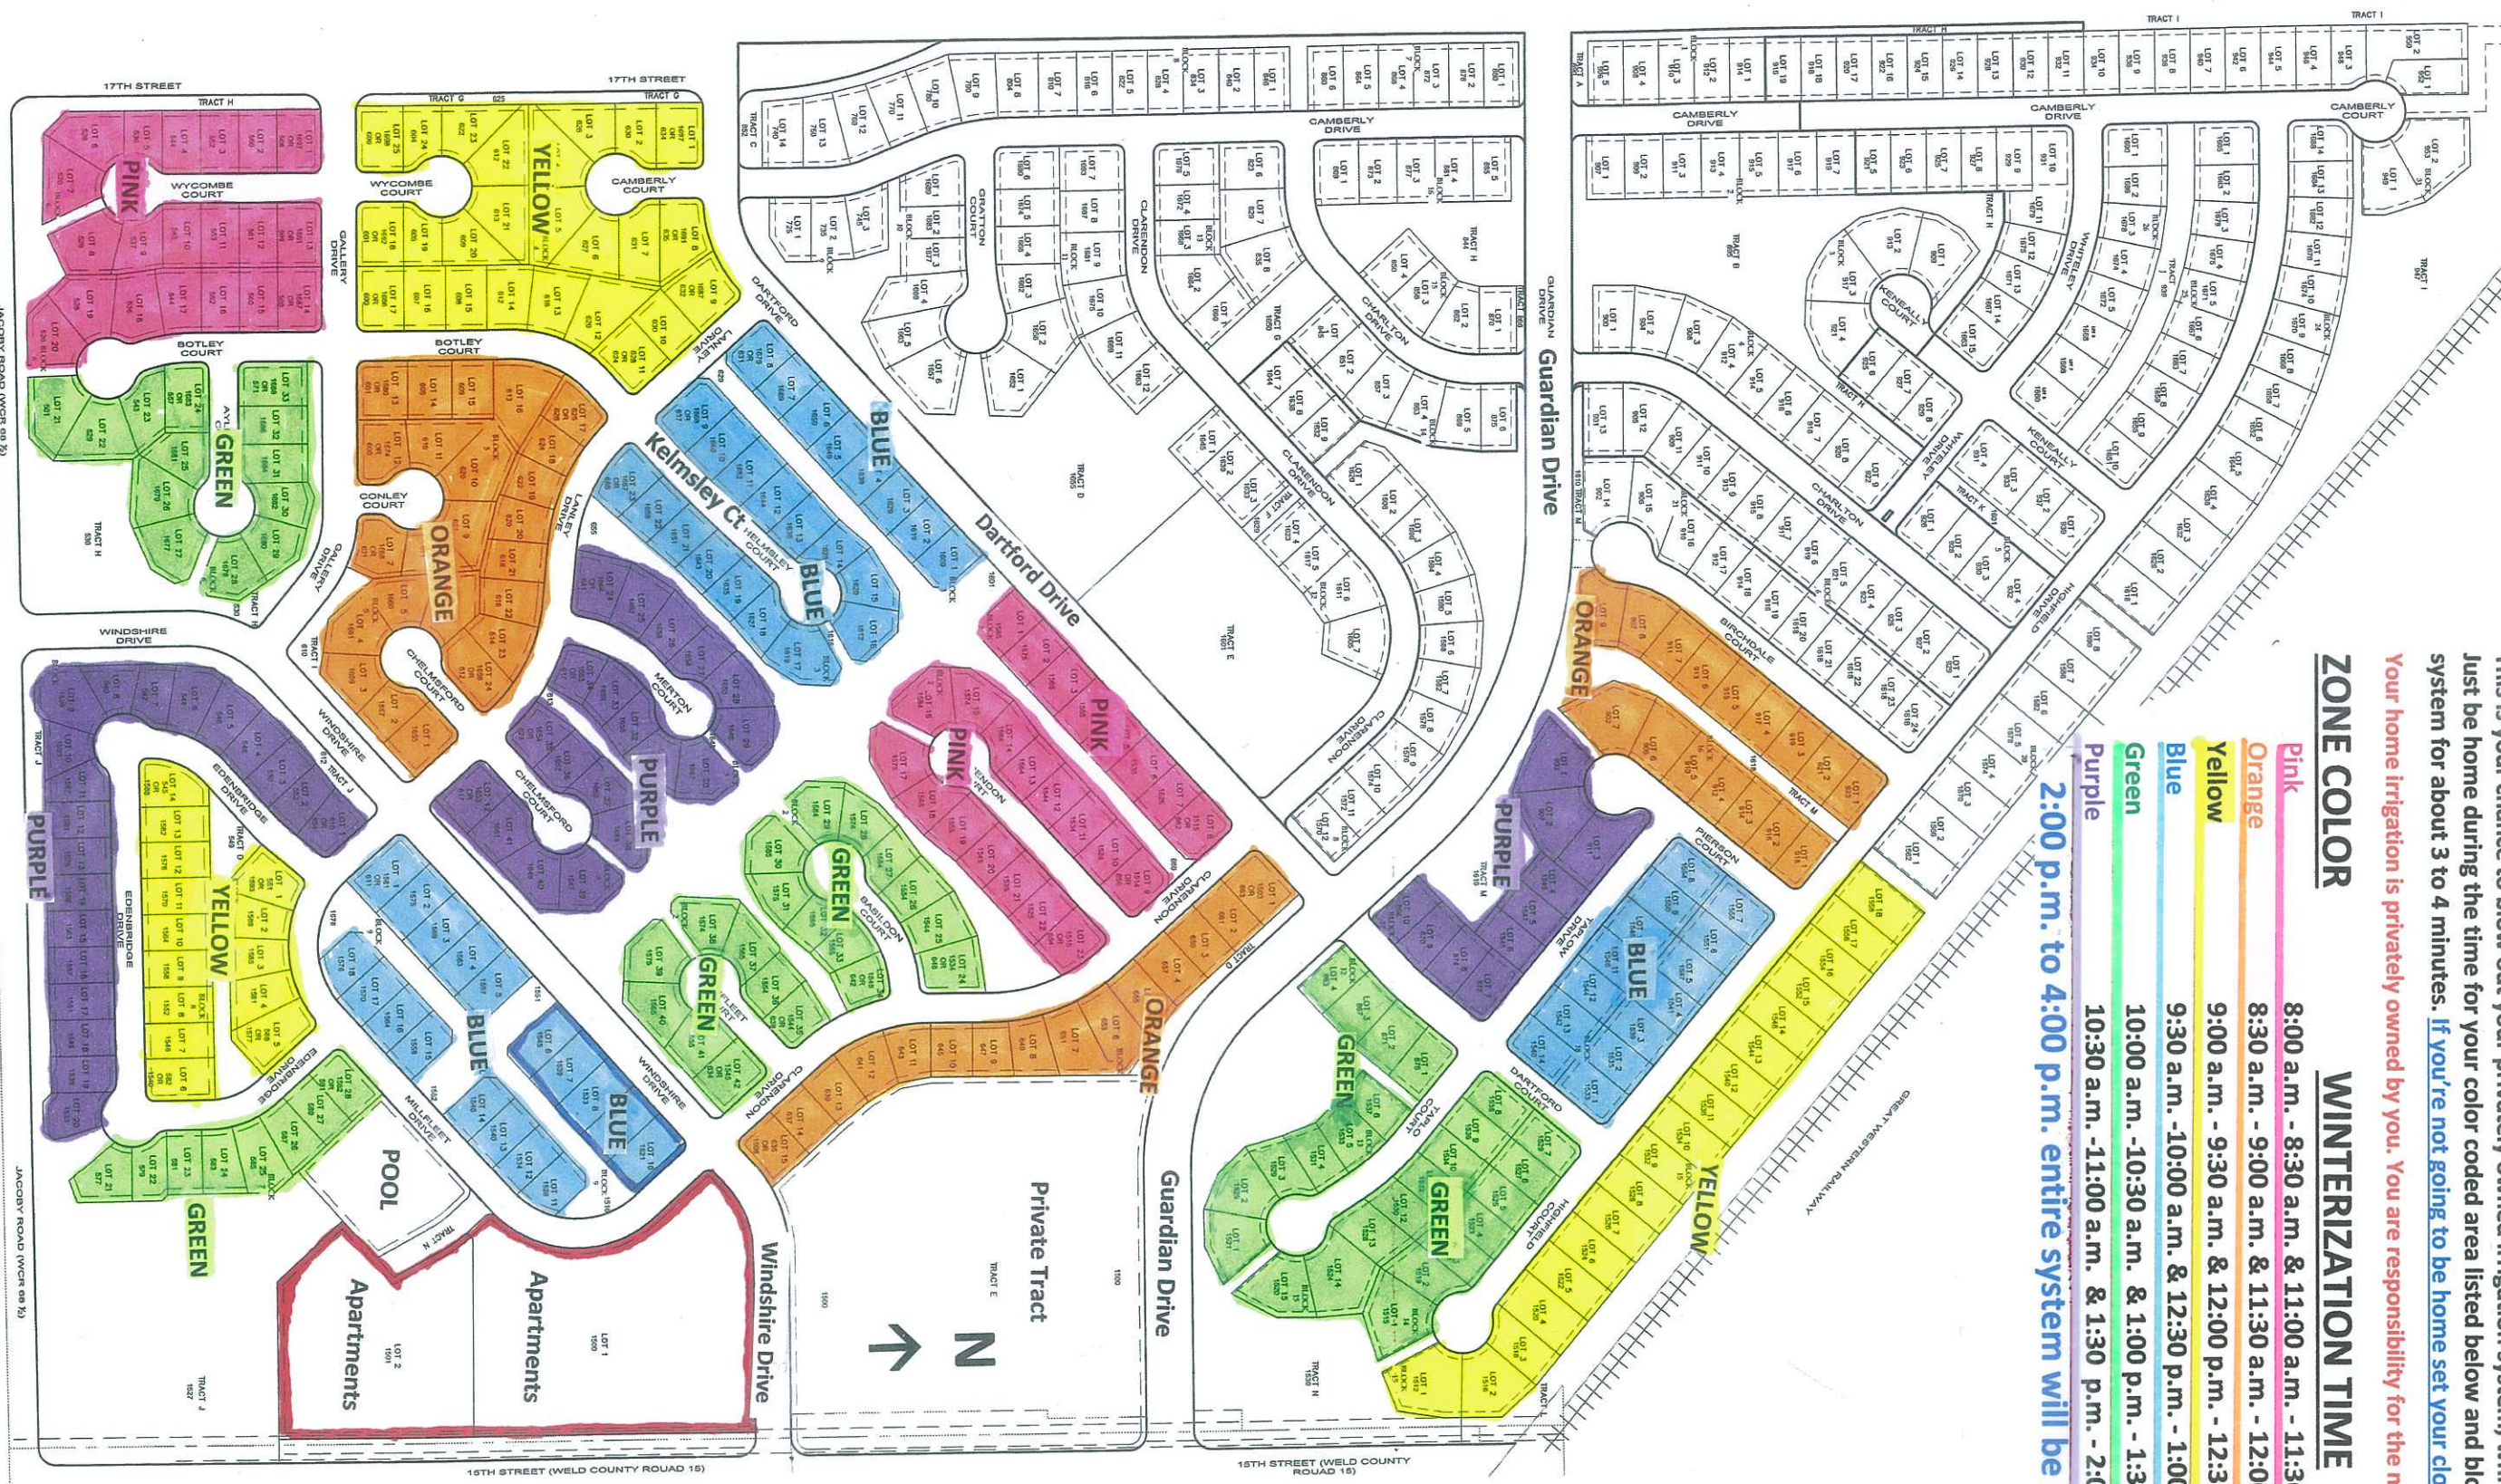

Your home irrigation is privately owned by you. You are responsibility for the maintenance and blow out.
