

# Non-Potable Water System Winterization Schedule

**10/21/2023 is the blow out day for the non-potable water system.**

**The Friday, before 10/20/2023: The Non-potable water system is turned off.**

**The 3<sup>rd</sup> Saturday of October (Every year)** the District will blow out the non-potable water system. The District has the non-potable water system blow out schedule posted on the web site. The District will also e-mail out through the web site, you must join the web site to get these e-mails. Tell your neighbors please.

**To blow out the non-potable water system on Saturday, we shut off the non-potable water system on the Friday before Saturday's** blow out; This way the District's contractor can hook up air compressors, open and close certain values to accomplish this blow out on such a large system.

This scheduled blow out of the non-potable water system is your chance to blow out **your privately-owned irrigation system,** while the District blows out the Districts main lines.

1. Before the main line blow out: **Clean your inline filter if you have one,** if you don't you should install one before next year. Also find your irrigation shut off value, make sure you know the location. **Turn off your irrigation value after blow out** if you choose.
2. If your home or not, **set your irrigation clock during the scheduled time** for your color-coded area on the map that is posted on the web site. Or do it manually.
3. **DO NOT START YOUR CLOCK BEFORE YOUR START TIME.**
4. Set your irrigation clock to blow out each zone on your system for about 3 to 4 minutes, or until you see no more water coming out of the irrigation heads and switch to the next zone manually if at home.
5. If you're not going to be home set your irrigation clock to your start time or after in your zone.
6. After you blow out your irrigation system turn off your ball valve. This value is in your irrigation box.
7. If you do not have a in line ball value you should get one installed. **Do not go into District meter pit.**
8. Disclaimer: Your home irrigation is privately owned by you and you are responsible for the maintenance and the Winterization (blow out) of your own irrigation system. The District only blows out the main line non-potable water system this one day. If you miss this day, sorry you will have to set up your own irrigation system winterization (blow out). We advise you to make sure you have your own connection to blow out your own system in case you ever miss this day.
9. This is a good day to clean your inline water filters and irrigation heads. Inline water filters and irrigation heads should be cleaned several times a year. If you do not have an inline filter, you should get one installed along with a blowout/drain connection. Then make sure you know where your shut off value located and how to turn off. **As always, please stay out of the District meter pits.**

<b>ZONE COLOR</b>	<b>WINTERIZATION TIME-----See colored coded Map.</b>
<b>Pink</b>	<b>8:00 a.m. - 8:40 a.m.</b>
<b>Orange</b>	<b>8:45 a.m. - 9:25 a.m.</b>
<b>Yellow</b>	<b>9:30 a.m. - 10:10 a.m.</b>
<b>Blue</b>	<b>10:15 a.m. -10:55 a.m.</b>
<b>Green</b>	<b>11:00 a.m. -11:40 a.m.</b>
<b>Purple</b>	<b>11:45 a.m. – 12:25 p.m.</b>

**12:30 p.m. to 3:30 p.m. entire system will be blown out.**

**In case you missed your scheduled time.**

**Your home irrigation is privately owned by you.**

**You are responsibility for the maintenance and your own winterization of your irrigation system.**

**The District only blows out the non-potable water system this one day.**

**If you miss this day, you will have to set up your own winterization (blow out).**
